Mr. Paul Allen
VULCAN CAPITAL
435 Tasso St., Suite 210
Palo Alto, CA 94301

Ref: Fusion Energy, Tri-Alpha Energy, and PowerMasters™ Video Game Development

Dear Mr. Allen:

As a pioneer funding the new generation of innovative confinement fusion and Tri-Alpha Energy, you are very much aware of the need for fusion as fossil fuel reserves tighten. Additionally, the migration to fusion and synthetic fuels produced through fusion puts to rest AGW concerns. Our fusion energy elevator speech sums this up very succinctly at: <http://fuelfuture.com/elevator-speech/>

Our latest published article **“Fusion Energy; Too Important To Fail – Too Big To Hoard”** at <http://fuelfuture.com/fusion-energy-too-important-to-fail-too-big-to-horde/> points out that fusion is a very arcane subject to the general public, politicians, and many scientists outside the fusion community. Tri-Alpha Energy is one of the star start-ups used in the article as a case in point.

Pat Boone in Hollywood, and I are demystifying fusion and the need to develop it and commercialize it soon. The **Time Magazine** article on fusion as published last Friday <http://fuelfuture.com/inside-the-quest-for-fusion-clean-energys-holy-grail/> shows that private enterprise fusion firms have the potential of demonstrating and even commercializing fusion before ITER <https://www.iter.org/> finishes its regiment of experiments. Your involvement and Tri-Alpha Energy are highlighted in paragraph 5. The New York Times published a similar article Sunday at: <http://fuelfuture.com/start-ups-take-on-challenge-of-nuclear-fusion/>

Fusion in many ways is the exploration of inner-space. The **Time Magazine** article mentions Dr. Rostoker’s (founder of Tri-Alpha Energy) insistence that research with high

energy particle accelerators would have led to quicker fusion. Unfortunately the U.S. gave up its lead in high energy physics when it canceled the superconductor collider center in Austin Texas in the early 1990s.

Your tour of Sandia National Laboratory and the Z-Machine facility with Dr. Michael Cuneo and Dr. Dan Sinar several years ago will certainly resonate with the statements made by Norm Rostoker regarding big government sponsored projects as published in the **Time** Magazine article above.

Our intent is to make the exploration of inner-space and the development of fusion America's project. The moon landing of the 21st Century if you will. We want all Americans to be involved.

We plan to produce a hit electronic interactive game called **PowerMasters™**. The monetization and revenue model is based on Candy Crush Saga. This is described on our EnergyCite® website at: <http://www.energycite.com>

Revenues from the games along with significant revenues resulting from licenses granted to utility company's nationwide to practice our patents covering the "utility smart meter" [see: <http://energycite.com/ip.php>] will be invested into a fusion energy consortium as described in the concluding section of the article mentioned above <http://fuelfuture.com/fusion-energy-too-important-to-fail-too-big-to-horde/>. This is explained in my article's conclusion section, numbered points 1-14:

The video game franchise will be a winner in the business sense. As importantly they will create tremendous societal value teaching people important lessons in science, energy, money and values.

We plan to produce, manage, and launch a first class Kickstarter campaign which will rival the top producing Kickstarter game campaigns in capital: <http://fuelfuture.com/38-of-the-top-crowd-funding-projects-for-june-2015-are-games/>

We have prepared a unique financial offering to finance this early stage of the project which in essence is a high yield company note(s) syndicated as a private bond. The offering is presented at: <http://energycite.com/opportunity.php> Of course we have flexibility in dealing with high net worth individuals, family foundations like the Paul G. Allen Foundation, or company's such as Vulcan Capital who may elect to fund our entire modest needs.

Our lead project designers would like to involve both Dr. Edwin (Buzz) Aldrin and Harry Hamlin in a trailer for the energy based game series. Both Dr. Aldrin and Mr. Hamlin have interests in Tri-Alpha and your help in setting the ground work for these contacts is

also appreciated. Pat Boone has sent a letter to Dr. Aldrin and Mr. Hamlin acquainting them with our project but not at this level of detail.

Would you please acknowledge receipt of this email and let us know ASAP what more information we can supply you in order to make this project happen. It is important to all of us and for our country. It is such an important issue that Pat and I have raised it to the attention of world leaders, and most recently Pope Francis, as a solution to his call for better planet stewardship and the upward rising up of poor nations worldwide:

<http://fusion4freedom.us/letter-to-pope-francis/>

Thank you.

Sincerely,

Tom Tamarkin
